DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Szymansky et al. in view of Eckardt. Szymansky shows the claimed invention except that the cover does not have sides. Note that the cover or cap has a curved front face with a slanted upper portion. Eckardt has a cap with a front and back and two sides. The sides provide protection for the cutting head. Obviously one of ordinary skill in the art would add such sides to the cap of Szymansky to provide more protection for the cutting head. Regarding claim 2, various indicators and logos have been placed on caps and razors in the past and would be obvious to place on the cap of Szymansky.

Allowable Subject Matter

Claims 3-4 are allowed.
